PROFESSIONAL PROFILE

Application User Experience Designer and Full Stack Developer with 15+ years of experience designing, developing, and implementing user-centric products through creative solutions and intuitive interface design. Possessing a proven track record of increased efficiency through the optimization of web functionalities and data parsing as well as an insatiable appetite for innovative methodologies and software, I'm seeking an opportunity to utilize professional best practices and cutting-edge technologies as an active member of a team of professionals.

WORK HISTORY

UX ARCHITECT | DEVELOPMENT TEAM LEADER

McCormackDesigns.com | April 2005 - Present

Company founder, facilitating all project timelines from conceptualization through implementation. Regularly manages simultaneous projects, performs front end web development, selects development teams, schedules development tasks, and maintains clear consistent client and vendor communications.

- ▶ Built a scalable database and web application for Hallowell's full catalog of product information, enabling the company to discontinue printed catalogs, go paperless, and save money.
- ▶ Skyrocketed title insurance company's efficiency through the development of a custom policy-generator web application. Subsequent workflow research facilitated the development of additional automated solutions and tools, further increasing daily output.
- ▶ Conducted design workshops with stakeholders, translating complex data into concept designs, mockups, and fi-fidelity prototypes. Provided cost and time estimates and fielded questions.
- ▶ Constructed intuitive backend tools empowering staff to maintain data.
- ▶ Fostered long-term, remote, and in-person working relationships with multiple clients and team members using various collaborative software.

WEB DESIGNER | FULL STACK DEVELOPER

List Industries Inc. | Full-Time (On-Site): Jan 2011 - May 2012 |
Contracted (Remote): June 2012 - Present

List Industries' first in-house web developer, collaborating with eight departments to design backend tools streamlining operations and facilitating coordination efforts across manufacturing plants, distribution centers, dealer locations, and administrative offices throughout the country. Designed, developed, and maintained nine individual websites for company subsidiaries.

- ▶ Revitalized List Industries' online presence and published their first digital catalog.
- ▶ Used Adobe Suite for multimedia editing of product photography, graphics, and videos for both print and internet marketing.
- ▶ Maintained strong in-house working relationships with colleagues across various departments.
